- **Tools:** Git, GitHub, Kali Linux, Nmap, Metasploit, Shodan, Hydra, John the Ripper, Lynis

CERTIFICATIONS

- IBM DevOps Essentials (Coursera)
- Penetration Testing Web Hacking – In progress
- Advanced Graphic Designing

PROFESSIONAL OVERVIEW

Technology professional with expertise in cybersecurity, mobile application development, and artificial intelligence. Experienced in penetration testing, secure app development, and building AI-driven solutions. Passionate about creating innovative, secure, and intelligent technology solutions.

PROFESSIONAL EXPERIENCE

Intern | ISPR (Inter-Services Public Relations)

Present

Researching International Relations, focusing on IT, AI, and National Security. Analyzing geopolitical dynamics in Balochistan and Sindh, military cybersecurity frameworks, and cybercrime trends while preparing policy briefs on emerging security challenges.

Cybersecurity Intern | DevelopersHub Corporation

8 Weeks

Conducted vulnerability assessments and penetration testing on web applications, identifying and mitigating SQL Injection, XSS, and authentication vulnerabilities. Implemented JWT authentication, bcrypt hashing, and security headers following OWASP Top 10 practices, and performed Linux security audits.

PROJECT

Prescripto: A modern healthcare appointment booking application built with React and Vite, designed to provide an easy and user-friendly doctor consultation experience.
Recycle App: Firebase-based waste reporting app with secure authentication.
AI Diabetes Prediction: ANN, CNN, and DNN models for medical prediction.
Tesla Clone: Responsive website using HTML, CSS, and JavaScript.
